REMINGTON® SR-101
SINGLE ELEMENT
ELECTRIC TYPEWRITER
SPERRY REMINGTON

for more than thirteen years
there was only one
now there's another
REMINGTON SR-101
it's probably
the most important thing we've done
for the office equipment industry
since we made the first typewriter
a hundred years ago
the principle is beautifully simple
all the type characters are concentrated
on a single unit or element
goodbye type bars and moving carriages
the typing mechanism
is now more flexible and versatile
you can change type styles in seconds
simply by changing elements
now one typewriter
can do the job of hundreds
simpler and surer and faster
single element typing
is the ultimate in efficiency
and the results are flawless
REMINGTON SR-101
single element electric typewriter
for more than thirteen years
there was only one
now...you have a choice!

Remington® SR-101
single element electric typewriter
is the productive and efficient answer to an ever-increasing volume and variety of paperwork. In addition to the speed of single element electric typing, many time-saving, error-reducing features enable the typist to produce more work, more efficiently. The versatility of interchangeable typing elements insures quality results for a wide variety of jobs.

increased production
